RAILS SCAFFOLD

- `rails generate scaffold [name] [fields...]`

- Generates:

  - Database migration

  - Model

  - Controller with REST actions

  - Views

  - Routes

EXAMPLE: BLOG POSTS

- Model name: Post

- Fields:

  - title (string)

  - body (text)

  - author (string)

  - created_at & updated_at (datetime) (included!)

- `rails generate scaffold post title:string body:text author:string`

DO IT LIVE!

OTHER RAILS GENERATORS

- `rails new [appname]`

- `rails generate model [name]`

- `rails generate controller [name]`

- `rails generate migration [name]`

To get help, don't provide any arguments at all:
`rails generate model`

THANK YOU!
